# MEN ENDING THE HAZARDS OF DENIAL

## **M.E.T.H.O.D.**

The METHOD (Men Ending the Hazards of Denial) program was developed to address the breakdown of the family, providing a catalyst through which today's at-risk youth may develop fundamental relationships with their absent parent, or parents. Bridging the gap so that communications may spawn, which will help curtail the potential for bad choices, enabling goal development as youth become adults. LCoA's ultimate goal with the METHOD program, is to teach absent parents, along with their children (society's future parents) the value, importance, necessity, and joy of being there for their kids.

Children's children are the crown of old men; and the glory of children are their fathers.  
(Proverbs: 17:6)

## **ARE YOU A DAD AND WANT TO BECOME MORE ACTIVE IN YOUR CHILD(REN)'S LIFE?**

1. As time passes, do you continue to wonder about your child and his, her or their lives? This is not uncommon. As a parent, there is a fundamental urge to pass along values and ideals that each and every father has to offer his son or daughter.
  2. After child support payments, there may be little or nothing left to devote to quality time between that child and yourself.
  3. If you were raised without a father, the cycle of children growing up without their father could end with you becoming involved with the M.E.T.H.O.D.
- 

## **KIDS NEED MORE THAN FINANCIAL SUPPORT; THEY NEED YOU, TOO!**

- Think you have nothing further to offer? Never underestimate the power of a parent's being there.
  - One discussion about character and ethics from a parent can mean the difference between success and a life of crime.
  - Having both parents' involvement provides the emotional standard necessary to help prevent teen-age promiscuity and drug use.
- 

## **ACTIVITIES DESIGNED TO CREATE MEMORIES**

In keeping with Living Canvas' overall mission, many of METHOD's activities interact with nature to help nurture these relationships, while simultaneously providing knowledge about and appreciation for wildlife and forestry.
